Prices and Prospects.

A TEMPORARY CUT IN COKE OUTPUT SOFTENS PRICES

Of Spot Deliveries but the
Contract Market is
Unchanged.

FURNACES BALLED UP SOME

And Accumulations of Coke on Track
Follow But Situation Will Brighten
in Few Weeks and Meantime
General Conditions Are Improving.

Special to The Weekly Courier.
PITTSBURGH, July 28.—The stiffening in the Connellsville coke market appears to have endeavored to follow too rapid a pace of late, at any rate there has been a little backset in the past week, perhaps to enable the movement to acquire fresh wind. The market is not off a great deal, and is still quotable at a soft advance above prices ruling in the latter part of June. Prompt furnace coke, in other words, has been easily available at \$1.60 the past week, while on contracts running through the half year there have been a few sellers at least willing to shade \$2.00 a ton.

The market for contract furnace coke has not definitely lost ground, as sellers in the main are fully as strong in their views as they were a fortnight ago, but the softer position in prompt coke makes furnaces somewhat less eager to take orders for a period of time. It appears that the increase in production of merchant coke has been a shade too great, at least for present conditions when four or five consumers have given instructions to their shippers to decrease shipments temporarily. There is no permanent decrease in consumption, as the furnaces merely have minor troubles that will doubtless be righted in a week or two, but meanwhile there has been an accumulation of coke on track and offerings of spot and prompt coke have been at lower figures. The fullness of such reductions is shown by the fact that scarcely any additional coke has been sold by reason of the reduction. The market is now quotable as follows:

Prompt furnace, 1st quality, \$1.70
Contract furnace, 2nd quality, \$1.75
Contract furnace, 2nd quality, \$1.75
Contract furnace, 2nd quality, \$1.75

Nothing has come of inquiries recently put out for the first half of next year, and it is quite unlikely that any deals will be concluded for such delivery, as the coke operators would insist upon a stiff price and the furnace men not able to pay the volume of business done since sales in the past week have been relatively light. Several merchant furnaces that have been thought likely to blow in shortly are not yet scheduled with definite dates for resumption, and it is likely they will not blow in until they have succeeded in selling some pig iron at advances over the present market.

On the other hand the improvement in the steel business proper is proceeding even more rapidly than two or three weeks ago. All the steel companies have increased their output, until the open-hearth departments are operating full and the Bessemer departments nearly so. Nevertheless they are looking business as a greater rule than they are shipping, and orders are accumulating on mill books. Delivery promises are stringing out, and in bars the shortest promise is six weeks, while on large rounds, such as are used for shells, some of the mills are filled for six months.

Bessemer pig iron has advanced 25 cents in the local market the past week, two sales of 1,500 tons and 150 tons respectively, being reported at \$14.25 Valley, other grades being unchanged. The market is now quotable as follows:

Bessemer \$14.25
Basic \$13.00
Foundry \$12.75
Malleable \$12.75
Gray forge \$12.50

These prices are f. o. b. Valley furnaces, the Pittsburgh market being higher by the 95-cent freight.

SEEKING A LOCATION.

La Belle Steel Company to Build By-Product Plant.
The La Belle Steel Company's engineers are busily engaged in preparations for the erection of a by-product plant at the Stouffville steel mills. Available space is scarce. The company could build its coke ovens on the West Virginia side of the Ohio, but this would entail the construction of an expensive bridge.

Plans for the new coke plant will soon be ready for submission to the directors of the company. The La Belle company operates in the Connellsville region, having 200 ovens at La Belle. It has also been a buyer from merchant operators. The company is said to have West Virginia coal holdings. Its furnaces are now operating on Connellsville coke.

Coke Men in Town.
James and Charles Jamison and J. S. Amend, officials of the Jamison Coal & Coke Company, were in town Friday.

IMPROVEMENT IN STEEL PASSED ALL DANGERS

Second Quarter's Earnings of Steel
Corporation and Others Show
Returning Prosperity.

Special to The Weekly Courier.
NEW YORK, July 28.—The American Metal Market and Daily Iron & Steel Report will review the iron and steel situation tomorrow as follows: The second quarter's earnings of the Steel Corporation, \$27,580,000 after payment of fixed charges of subsidiary companies, are somewhat larger than was expected in the steel trade. While they were two and one-half times those of the December quarter, and more than double those of the March quarter, it is quite certain that the present quarter will show still larger earnings, probably nearer \$35,000,000 than \$30,000,000. The remarkable showing of the Republic Iron & Steel Company, with 17 1/2 per cent earnings in the first half of the year than in the first half of last coupled with the report of the Steel Corporation, shows the steel companies can make more money now than formerly, with wage rates and selling prices taken on the same levels.

The improvement in the steel market has easily passed all dangers of backsets, for the chief feature now is the heavy buying by jobbers and manufacturers that are entirely too small to conduct business when the steel producer cannot be depended upon to make abnormally prompt shipments. Steel orders are running far ahead of shipments and in bars, plates and shapes the orders are almost double the shipments. The steel industry is wound up to run a considerable time, and many months and perhaps two years or longer. Not only is the open-hearth steel making capacity of the country engaged, the material is scarce, and the Bessemer capacity bids fair soon to be fully engaged, as some consumers become reconciled to taking Bessemer steel instead of open-hearth.

Delivery promises on merchant steel bars range from six weeks upwards, and on plates and shapes from four weeks upwards. Blue annealed sheet deliveries are falling behind, and black sheets are suffering in price. Spot and prompt coke have declined with the decline in steel.

Pig iron shows more activity, but not enough as yet to insure any marked advance in price. Connellsville coke is weaker again, but scrap has stiffened markedly in most districts.

VIEW IT CHEERFULLY

Rogers, Brown & Company Find
Market Gaining Real Headway.

Rogers, Brown & Company, Cincinnati, among the more cheerful pig iron and coke market news this in their weekly market letter: "At this point it may not be amiss to dwell a moment on the subject of cost. Present prices of pig iron are practically cost prices. Furnacemen are looking for their fuel and requirements for the first half and find that a great change has taken place in the coke market. Few producers are showing any interest in first half business. Connellsville coke has recently advanced to \$1.60 a ton. In view of the higher prices which already prevail in the steel and allied industries, it is hardly probable that the furnacemen will care to sell their product at a loss. Everything points to but one very obvious conclusion: The price of pig iron is pretty sure to start upward in the near future. In the country coke market, conditions are active. Many of the Connellsville operators are so well sold up that they begin to be indifferent to new business. Some are considerably behind on deliveries. It is expected that this condition in Pennsylvania will soon spread to other districts."

UNION SUPPLY PICNIC

Employees Will Disport Themselves at
Oakland Park August 11.

The sixth annual picnic of the Union Supply company employees will be held at Oakland Park on Wednesday, August 11. Business will be entirely suspended on that date. A committee on arrangements is making plans to accommodate about 1,200 persons. Special trolley cars will be run from points near the stores to and from the park. Free transportation will be provided for everyone and the amusements of the resort will be open to the picnicers, the park having been reserved exclusively for the Union Supply Company and its guests.

There will be baseball games, athletic events and dances will be held, nothing will be left undone to make this the best outing ever held by the Union Supply.

HENDERSON TO RETIRE.

The Veteran Railway Superintendent
Hands In Resignation Monday.
J. B. Henderson, superintendent of the Port Hill, Paul and Railway plants of W. J. Rainey, will retire August 1, after serving 35 years with that concern. Mr. Henderson entered the employ of W. J. Rainey in 1880 as store manager of the coke region in 1887 as store manager. He became superintendent after General Manager T. J. Mitchell moved his offices from Vanderhill to Connellsville.

Mr. Henderson will be succeeded as superintendent of the three plants by Alvin Mitchell, new superintendent at Acme.

FURNACEMEN ARE ANTICIPATING A COKE PRICE GAIN

Improved Conditions Indicate That Market Will Soar.

MANY ARE QUIETLY COVERING

While Some Prefer to Buy From Month to Month, Shrewd Ones Are Making Their Own Supply Certain.

If there remains any pessimism among Connellsville merchant operators, it is being covered by the following editorial expression from The Daily Iron Trade ought to be assuring: "Small wonder that Connellsville coke operators are looking more cheerful than any time in the past few months. They have a good reason to be cheerful over market prospects. Coke, both foundry and furnace grades, is bound upward, it has hit its low point and other prices are being paid more or less cheerfully. These furnace men have had part of their coke sold at a profit, getting a fair share of the new business which is cropping out every day. While some future is still in line to purchase for months to months, yet most careful stock managers are waiting to cover as quickly and for as long a period as they can. The contract these days is a good piece of insurance, according to all appearances. Prompt furnace coke is quoted from \$1.70 to \$1.80 while some makers are holding as high as \$1.90 to \$2 on the longer contracts. So far as can be learned, little or no coke has been sold at a loss. The fact of the decline of the fourth quarter is to be expected. "The pig iron market in all sections of the country is waking up for the first time in two years. The southern market is showing upward signs of activity. The coke market in the north is being made, last week's total about 50,000 tons at Birmingham, and the usual sign of a rising market has made its appearance in that city in the form of inquiries for blanketed contracts, but not by speculators. These inquiries are perfectly well linked to take a chance on the present market, just as they would buy 'we stock' on the New York exchange. But it is the speculative iron that always comes back into the market some time in the future to plague original sellers. If this notion has taken hold, it is more likely to be a permanent one to turn down these speculative offerings; and in that they are wise. Additional southern furnaces either are blowing in or are preparing to re-light at once which shows that real, dark-looks are blowing up. At Cleveland, so steady has been the buying of foundry grades that prices have been advanced 50 cents a ton within a few days. In this district also furnaces are well backed with business, a considerable portion of recent takings being made from foundries, and more foundry inquiry is appearing. The daily advance in prices is continuing up appreciably and the lowest quotation heard is \$12.75 with one of the larger makers quoting up to \$13. Buffalo furnaces have good business on their books and shipments are clearing off the yards faster than the daily production. As for coke malleable and foundry grades are the more active and the strongly apparent market tendency is upward. Further satisfactory business is reported in the east and in the Pittsburgh-Valley territory where foundry iron is doing better than any time in months. Trade is now fairly fixed at \$13 minimum, and sales of Bessemer have been made at \$14.25, Valley.

"With the stage thus set, it is not strange that the Connellsville coke trade is expanding. Production last week was 371,144 tons, the merchant portion of this total making a record

COKE FREIGHT RATES.

The revised rates on coke per ton of 2,000 pounds from the Connellsville region to points both east and west are as follows:

THURSDAY MORNING JULY 29 1915

THE THIRD GERMAN NOTE

The third chapter of the diplomatic correspondence on the Lusitania affair finds the United States government firmly insisting upon the observance of the principle that the charter and cargo of a merchantman must first be ascertained before she can lawfully be seized and destroyed and that the lives of non-combatants may in no case be put in jeopardy unless the vessel resists or seeks to escape after being summoned to submit to examination.

The Government of the United States is not unmindful of the extraordinary conditions created by this war and of the radical alterations of circumstance and method of attack produced by the use of instrumentalities of naval warfare which the nations of the world cannot have had in view when the existing rules of international law were formulated and it is ready to make every reasonable allowance for these novel and unexpected aspects of war as set by Germany is warned that the United States cannot consent to waive any essential or fundamental right of its people because of the more alternation of circumstances.

President Wilson declares that recent events have shown that it is not altogether an idle threat to leave these men to the protection of the United States for Germany to limit the use of submarine warfare to the attack of unarmed and defenseless merchant ships. The German Government is plainly told that the United States cannot consent to waive any essential or fundamental right of its people because of the more alternation of circumstances.

The note is characterized by more clarity, coherence and consistency than any which have preceded it. It leaves the United States with much to consider. It is a question of international law. It is a question of the rights of non-combatants. It is a question of the rights of the United States. It is a question of the rights of the United States.

CONNELLSVILLE'S OPPORTUNITY

It may seem a little premature but now is the time to organize an organization under whatever name or form Conneltsville's industrial and business promotion bureau. The Chamber of Commerce has done good work in the past but it has been the victim of internal weakness and external opposition. The time has come when the Chamber of Commerce should be reorganized and its work should be extended to include the promotion of the city's interests.

As a distributor of the sophistry of political quacks and charlatans with relation to the tariff, the Chamber of Commerce has been a failure. It is time to reorganize and to make the Chamber of Commerce a success.

Coal and Coke Trade Comment

BLINZOL AND BUSCOMBI

The Dumezille tariff has not few defenders during the past 15 months. Democratic organs have been its chief supporters. It is a tariff which could admit the coal of the continent to the United States at a rate of duty which would enable the coal of the continent to compete with the coal of the United States.

The Standard Oil Company is a supporter of the Dumezille tariff. It is a company which is interested in the coal trade. It is a company which is interested in the coal trade. It is a company which is interested in the coal trade.

COAL AND COKE NOTES
